<u>Claims</u>

- 1. (previously presented) A method of increasing one or more of hair follicle development, tooth development, or sweat gland development, in a tissue, comprising increasing EDA1-II activity in the tissue.
- 2. (currently amended) The method of claim 1, wherein the method is a method of increasing hair follicle development.
- 3. (currently amended) The method of claim 1, wherein the method is a method of increasing tooth development.
- 4. (currently amended) The method of claim 1, wherein the method is a method of increasing sweat gland development.
 - 5. 21. (canceled)
- 22. (previously presented) The method of claim 1, wherein increasing EDA1-II activity comprises administering an amount of EDA1-II protein to the tissue sufficient to promote one or more of hair follicle development, tooth development, or sweat gland development.
- 23. (original) The method of claim 22, wherein the EDA1-II protein is a recombinant protein.
- 24. (original) The method of claim 22, wherein the EDA1-II protein comprises an amino acid sequence having at least 95% identity to SEQ ID NO: 2 and which encodes a polypeptide that enhances EDA1-II activity in the tissue.
- 25. (original) The method of claim 24, wherein the amino acid sequence comprises an amino acid sequence having at least 98% identity to SEQ ID NO: 2 and which encodes a polypeptide that enhances EDA1-II activity in the tissue.
- 26. (original) The method of claim 25, wherein the amino acid sequence comprises an amino acid sequence shown in SEQ ID NO: 2.
 - 27. 40. (canceled)
- 41. (previously presented) The method of claim 1, wherein the tissue is a tissue of a subject suffering from an ectodermal disease.
- 42. (currently amended) The method of claim 41, wherein the ectodermal disease is X-linked hypohidrotic ectodermal dysplasia (XLHED), autosomal hypohidrotic ectodermal dysplasia (HED), or alopecia.

- 43. 58. (canceled)
- 59. (previously presented) The method of claim 22, wherein the EDA1-II protein comprises at least 153 amino acids of SEQ ID NO: 2.
- 60. (previously presented) The method of claim 22, wherein the EDA1-II protein comprises at least 175 amino acids of SEQ ID NO: 2.
- 61. (previously presented) The method of claim 22, wherein the EDA1-II protein comprises at least 200 amino acids of SEQ ID NO: 2.
- 62. (previously presented) The method of claim 22, wherein the EDA1-II protein comprises at least 300 amino acids of SEQ ID NO: 2.
- 63. (previously presented) The method of claim 22, wherein the EDA1-II protein is a fusion protein.
- 64. (previously presented) The method of claim 59, wherein the EDA1-II protein comprises 1-10 amino acid substitutions.
- 65. (new) The method of claim 22, wherein the EDA1-II protein comprises amino acids 239-391 of SEQ ID NO: 2.
- 66. (new) The method of claim 22, wherein the EDA1-II protein comprises amino acids 153-391 of SEQ ID NO: 2.
- 67. (new) The method of claim 22, wherein the EDA1-II protein comprises amino acids 133-391 of SEO ID NO: 2.
- 68. (new) The method of claim 22, wherein the EDA1-II protein comprises the C-terminal 240 amino acids of SEQ ID NO: 2.
- 69. (new) The method of claim 22, wherein the EDA1-II protein comprises the C-terminal 211 amino acids of SEQ ID NO: 2.
- 70. (new) The method of claim 24, wherein the EDA1-II protein having at least 95% identity to SEQ ID NO: 2 includes an amino acid substitution at position E294 of SEQ ID NO: 2.
- 71. (new) The method of claim 24, wherein the amino acid substitution at position 294 of SEQ ID NO: 2 comprises an E294V, E294L, E294A, or E294T, substitution.
